

CLOUD COMPUTING

THE INDUSTRY DEFINES CLOUD COMPUTING AS THE PROVISION OF COMPUTATIONAL RESOURCES ON DEMAND VIA A COMPUTER NETWORK.

EGOMEDIA's infrastructure is split into several data centers dedicated to cloud computing in order to be able to offer our clients the most reliable services.

Our infrastructure

Our infrastructure offers excellent material and software performance and important scalability thanks to our virtualization principals addressed to our "large company" clientele. Public and Private clouds are now readily accessible thanks to EGOMEDIA.

Through an ultra-fast OC48 connection, our partners that have chosen cloud computing, can access their files and applications within our infrastructure. They also limit their material and personnel investments as well as reduce their energy, space and air conditioning consumption.

The cloud computing service offered by Egomedia conforms to the following requirements :

- Fluidity of exchanged data
- Fluidity of exchanged data
- Incremental saves, at the rate of two per day

++

Our solutions

The SaaS solutions can also be included in the cloud computing service offered by EGOMEDIA.

Our qualified consultants are also able to help direct you towards the CRM SaaS models (on demand software membership) and collaborative tools that would represent the best quality/suitability for your company.
